INFORMATION *and* INSTRUCTIONS

A GARDENING catalogue, that is really representative of the choicest and best products in the various departments of Horticulture, requires a tremendous effort on the part of those who assist in its preparation, for it is apparent that it cannot be the work of one individual. The mere printing and illustrating is nothing as compared with the work involved in the preparation of the text. An organization such as ours, where each department is managed by a capably trained and efficient executive, must show continual progress all along the line through its offerings to the gardening public, in order to maintain its well-established reputation as a reliable and responsible institution.

We aim to keep all our departments up to date. We include those items that show merit over older but similar types, which are discarded. Whether it be a flower, vegetable or plant, each is given its true interpretation in color, size, character and general utility.

Research in Lilies alone has brought us in contact with some 110 or 115 varieties gathered in the distant regions of every continent in the world; these have been carefully classified, described and illustrated and are offered to our American friends, in such a comprehensive form, that the merest amateur can have lilies in his garden that were previously unheard of. Many

of them are listed in this catalogue, but complete descriptions are given in our book "Consider the Lilies" devoted to Lilies exclusively (see page 62).

We invite inquiries from those seeking advice on Horticulture as we have in our establishment experts who are well qualified to impart information. It may be possible that there are many articles not enumerated in our comprehensive list but as we have extensive sources of supply an inquiry will bring the desired information and lowest quotation on high grade stock.

W. E. MARSHALL & CO. INC.

ORDER EARLY. We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

Orders for Bulbs, Plants and Nursery Stock will be shipped in due time for planting in season.

PARCELS POST. We deliver free by Parcels Post all seeds, when cash accompanies the order, except Farm Seeds or Clovers. If these are wanted by mail, please add the cost of postage at zone rates.

Fertilizers, insecticides, sundries, trees and plants are, at all times, except as stated below, excluded from free delivery.

No charge for delivery to railroad station, steamer or express office.

DELIVERY. We deliver free by Parcels Post, Express or Freight (at our option) all Fertilizers, Insecticides or Garden Sundries on all orders value \$3.00 or over, when cash accompanies the order, within a radius of 50 miles of New York City.

ESTATE SUPERINTENDENTS, GARDENERS AND FARMERS. Persons requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoroughly experienced in every branch of the business. There is no charge for this service.

LANDSCAPE DEPARTMENT. The advice of Donald E. Marshall is available without charge to all regular or prospective customers of our firm. Reasonable fees charged for planting and design. If you want any landscape feature, let us help you select, place and plant it properly.

PRICES. The prices published in this catalogue are subject to market changes without notice. Owing to the fluctuating market in prices of all materials, we cannot bind ourselves on prices of any articles.

PAYMENT. All orders should be accompanied by cash in the form of Draft, Cheque or P. O. Order. Owing to the difficulty in collecting accounts, no order from parties unknown to us or whose accounts remain unsettled will be attended to unless accompanied by remittance.

C. O. D. SHIPMENTS. We are always pleased to supply seeds to be paid for on delivery. Bulbs, Plants, Fertilizers, Insecticides and Perishable Stock will not be sent C. O. D. unless 50 per cent cash accompanies the order.

WE ISSUE THE FOLLOWING CATALOGUES AND SPECIAL LISTS

Marshall's Lawn Grass Seeds

Marshall's Lawn Grass Seeds have given universal satisfaction for the past 33 years and are used on many of the largest estates in every section of the country for making the best lawns. Our mixtures contain only the best grades of re-cleaned grasses blended in proportions to give quick and permanent results.

MARSHALL'S "Durogreen" LAWN GRASS

Marshall's Durogreen Lawn Grass Mixture (formerly called Special Lawn Grass) produces a perfect as well as permanent lawn of luxuriant richness. It quickly forms a closely interwoven, firm and elastic turf ready for cutting in about 6 weeks from time of sowing. Durogreen mixture is the result of years of experimenting and is composed of the proper proportions of fine-leaved, deep rooting, perennial grasses which will thrive under varied conditions of soil and climate; maintaining a succession

of growth during the different seasons of the year, thus insuring a rich, deep green, smooth and velvety lawn, free from clumps. This is a scientifically blended mixture, containing only the highest grade of re-cleaned seeds of Red Top, Kentucky Blue, Chewing's Fescue and Colonial Bent grasses, blended in proper quantities. Price: Lb. 60c, 5 lbs. \$3.15, 20 lbs. \$10.00, 100 lbs. \$50.00. Delivered transportation paid when cash accompanies the order.

MARSHALL'S "Matchless" LAWN GRASS

Marshall's Matchless Lawn Grass Mixture (formerly called Central Park) still maintains a high place in the esteem of those who desire an even, dense growth of permanent sward very early in the season. This mixture contains no annual grasses so detrimental to a permanently good lawn. Only grasses of lasting value and extreme hardiness are used in this popular mixture and we exercise great care to use only the purest seed in the proper proportions in its blending. This mixture is recommended to those who desire a popular priced mixture for average conditions and requirements.

Our Matchless Lawn Mixture is prepared from our own formula and must not be confused with many mixtures that are sold under this name. It is composed of only the best re-cleaned seeds, containing Kentucky Blue, Fancy Red Top, Fescue, Perennial Rye and a small quantity of White Clover, all blended to warrant perfect results.

1 lb. will sow a plot 15x15 ft.; 3 1/2 lbs., 25x40 ft. (1,000 sq. ft.); 150 lbs., 1 acre (43,565 sq. ft.). Price: Lb. 45c, 5 lbs. \$2.15, 20 lbs. \$8.00, 100 lbs. \$40.00.

MARSHALL'S "SHADY PLACE" LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses

used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees. Price: Lb. 60c, 5 lbs. \$3.00, bu. (20 lbs.) \$11.00, 100 lbs. \$55.00.

Delivered transportation prepaid when cash accompanies the order.

For best results use Marshall's Lawn Dressing for new and old lawns.

The Lawn. The latest and best knowledge on the making and upkeep of lawns. By L. S. Dickinson. \$1.25, Postpaid.

For Beetle Grubs in Lawns use 15 lbs. Magnesium Arsenate for each 1000 feet of space. Apply in September mixing it with sand.

**MARSHALL'S
ALL BENT FORMULA
LAWN GRASS**

For many years Bent Grasses have been used for Putting Greens with great popularity and recently many are using them for lawns with perfect results. Our mixture contains only Bent Grasses in variety. **Price: Lb. \$1.70, 5 lbs. \$8.00, 20 lbs. \$30.00.**

**MARSHALL'S
CHEWING'S FESCUE
FORMULA
LAWN GRASS**

To procure an exceptionally fine lawn that will withstand drought and other adverse conditions, we recommend this mixture. It is composed of Chewing's Fescue, various Bents and a small proportion of Red Top. These grasses will give a wonderful dark green texture and combined with their spreading habit and thick growth will give a velvety appearance throughout the Summer and Fall. **Price: Lb. 90c, 5 lbs. \$4.35, 20 lbs. \$17.00.**

**MARSHALL'S
"TERRACE"
LAWN GRASS**

A special mixture of grasses for sowing on terraces and side hills—grasses that produce strong, spreading roots, thus preventing heavy rain from washing them out; that will withstand drought and exposure, thrive on shallow soils and produce a rich, green turf throughout the season. **Price: Lb. 75c, 5 lbs. \$3.65, bu. (20 lbs.) \$14.00, 100 lbs. \$70.00.**

**SPECIAL LAWN GRASS MIXTURE FOR
SEASIDE LAWNS**

A mixture of fine grasses peculiarly suited to seaside lawns and very sandy soils. **Price: Lb. 75c, 5 lbs. \$3.65, bu. (20 lbs.) \$14.00, 100 lbs. \$70.00.**

SPECIAL LAWN GRASS FORMULAS

The following formulas are recommended by the New Jersey Experiment Station, New Brunswick, N. J., for lawns under various conditions.

Marshall's Grass Mixtures for Golf Links

MARSHALL'S "PUTTING GREEN," or "TENNIS COURT" MIXTURE

A very carefully prepared mixture for use on putting greens, croquet lawns, tennis courts, bowling greens and lawns. This mixture produces a very thick, soft growth; when sown on a well-prepared ground, and mowed short will allow a ball to roll in almost a direct line. We especially recommend this mixture to those who are particular to obtain the very best. Our mixture contains only the very fine-bladed species of grasses without Rye Grass. 25 lbs. will seed a putting green 75 feet square. **Price: 5 lbs. \$5.00, 20 lbs. \$18.00, 100 lbs. \$90.00.**

MARSHALL'S FAIR GREEN MIXTURE

Marshall's Fair Green Mixture is composed mainly of perennial native grasses and two very important European grasses which have proven of great value for Fair Green use. They are all of dwarf, spreading growth, forming a close velvety surface which improves from year to year if given proper care.

This mixture contains no Clover but will be added if desired in quantity of one-half pound per bushel of grass seed. Sow 150 lbs. per acre. **Price: 20 lbs. \$12.00, 100 lbs. \$60.00.**

MARSHALL'S POLO FIELD MIXTURE

This mixture is composed of deep rooting grasses that will form an enduring turf and stand the roughest usage. Sow at the rate of 150 to 200 lbs. per acre. **Price: 25 lbs. \$15.00, 100 lbs. \$60.00.**

Grass for Hay Crops and Pastures

Mixtures for Hay and Permanent Pastures

The results obtained from our special Grass Seed mixtures are well known by the constantly increasing demand for them. Fall seeding is preferable, but spring sowing will be successful if done early, while the land is cool and moist. In addition to the Grasses, we advise sowing 10 lbs. of Mixed Clover Seed per acre.

We recommend sowing 50 lbs. to the acre.
Permanent Pasture Mixture No. 1. For cool and light soils.
Permanent Pasture Mixture No. 2. For medium soils.
Permanent Pasture Mixture No. 3. For heavy soils.
 Prices of any of the above Mixtures, 10 lbs. \$4.00, 100 lbs. \$35.00.

Marshall's Recleaned Grass Seeds

FOR LAWNS, FIELD AND OTHER PURPOSES

Many of the following grasses are used in Mixtures for Lawns and Pastures. The seeds we are offering show maximum purity and germination and are all of the highest quality procurable.

For anyone wishing mixtures of their own formula, we shall be pleased to ship the grasses separate or mix them to their own specifications.

Novelties and Specialties in Flower Seeds

ASTER SUPER GIANT LOS ANGELES

Los Angeles is the finest and largest shell-pink Aster on the market. The flowers are fully double, 6 to 8 inches across, graceful and delicately interlaced. The long, stiff stems are basal-branching and strictly non-lateral. Packet, 25 cents; 1/4 oz., \$2.00.

RUST-PROOF ANTIRRHINUMS

With the introduction of **rust-proof** strain of Antirrhinums which contains 75% of rust-proof plants we feel that their popularity, which has always been held back by rust, will increase and make Antirrhinums one of the most popular flowers in America.

Campfire. A new color in Antirrhinums, being pure luminous scarlet.

Canary Bird. Canary-yellow, vigorous.

Copper Shades. An outstanding variety due to the range of shades present.

Crimson. A magnificent rust-proof type.

Shasta. An early flowering pure white.

Rust Proof Mixed. Contains a wonderful range of popular colors.

Named varieties 50 cents packet. Mixed 35 cents packet.

ARCTOTIS HYBRIDS

These hybrids come in a brilliant assortment of showy daisy-like flowers, orange, bronze and reds predominating but also comprising many lovely shades of rose, cream-yellow, and salmon. They flower within six months from seed. Per packet 35c.

CALENDULA, ORANGE SHAGGY

This Calendula with its long and deeply lacinated petals is a distinct break. The flowers are a deep orange shading to a slightly lighter orange in the center, carried on long stems on plants about eighteen inches high. Per packet, 15c; 1/4 oz., 75c.

CELOSIA, HEATHERDELL

Ostrich Plume (Greenhouse Strain)

Whether grown outdoors or in pots the large plumed trusses, gracefully feathered and beautifully interlaced compel immediate admiration. Beautiful range of colors including yellow, pink and red shades. Also much appreciated as a cut flower. Mixed colors, per packet, 75c.

CHELIDONIUM, YELLOW QUEEN

This is a most attractive biennial. The plant reaches a height of 4 to 5 feet and has attractive grey-green cut foliage.

The flowers, of a beautiful butter yellow, are produced freely, and remind one of a yellow Romneya.

If sown early inside, it can be grown as a half-hardy annual. 50c per packet.

Chrysanthemum Coronarium Single,
Golden Glory

Cornflower, Jubilee Gem.

CHRYSANTHEMUM CORONARIUM SINGLE GOLDEN GLORY

Large perfectly formed flowers three to four inches across of deep canary-yellow petals and disc of same color. Flowers are produced on two-foot stems on plants growing three feet high. This annual Chrysanthemum, which is very free flowering and makes an ideal cut flower, should find favor with everyone. Per packet, 25c.

CLARY, OXFORD BLUE (Salvia Horminum)

Hardy annuals with blue flowers are always welcome, this clary is so unique in coloring that it merits special attention. As the name suggests, the bracts are Oxford blue, very broad and of a purity of tone that can be found in no other annual. Height 18 inches. Per packet, 35c.

CORNFLOWER, JUBILEE GEM

Jubilee Gem is a dwarf variety of Cornflower making a compact plant literally covered with flowers; the accompanying illustration shows its characteristics perfectly. It has foliage distinct from all other Cornflowers, forming a tufted mass of vivid green, contrasting well with the dark but vivid double blue flowers. The plant is about 12 inches in height.

Easy to grow, it is "everyone's" flower and is adaptable for almost any purpose to which a plant may be put. As an edging plant, a border plant, or for ground work in formal beds of Roses, etc., it will be found admirable, and it is a fine cut flower. Packets 50c each.

COSMOS, KLONDYKE ORANGE FLARE

Until the introduction of this early flowering strain, the brilliant orange Cosmos has been practically unknown in most parts of the country because of its late flowering habit. Orange Flare is a strain which is in full bloom less than five months from sowing. The color is the same vivid orange as the ordinary Klondyke with attractive light green foliage. 2 1/2 to 3 feet. Per packet, 35c; 1/4 oz., \$1.00.

CHEIRANTHUS ALLIONI, GOLDEN BEDDER

Gardeners throughout the country will welcome Cheiranthus Golden Bedder as an alternative to the orange form. The color is a deep golden-yellow. Its fine tone will blend more easily with many subjects than does that of Allioni.

It is a sweetly scented, long-lasting flower, especially if the seed pods are not allowed to form. Packet, 50 cents.

FLOWER SEED SPECIALTIES—Continued.

Gilia Liniflora.

**DELPHINIUM
WREXHAM
STRAIN**

We specialize in this strain as being one of the finest types of Delphinium the world affords. The name "Wrexham" is being extensively used to sell seeds having none of the true characteristics. Our stock is maintained strictly to type with broadbased tapering spikes and we are constantly complimented on the plants produced from our seed. Per packet \$2.00. 1/16 oz., \$5.00.

ERIGERON, DOUBLE AZURE BEAUTY

The plant reaches a height of about 2½ feet and is extremely floriferous. Azure Beauty is an ideal subject for the herbaceous border and an attractive cut flower. The azure blue flowers when first open are practically fully double and not an "eye" can be seen.

It is very hardy and if sown in March or April will flower the following spring. 50c per packet.

**GILIA LINIFLORA WHITE SWAN AND
BUNCH OF LILAC**

Introducing a new subject for cut flower use, Gilia Liniflora, a very easily grown, attractive annual. The plants are neat, upright and semi-compact in habit, 12 to 15 inches high, covered with dozens of the dainty, single flax-like flowers which are borne on long stems. White Swan is snowy white, and Bunch of Lilac a clear lavender-blue. Per packet 35c each; ¼ oz., \$1.00.

GYPSOPHILA PACIFICA

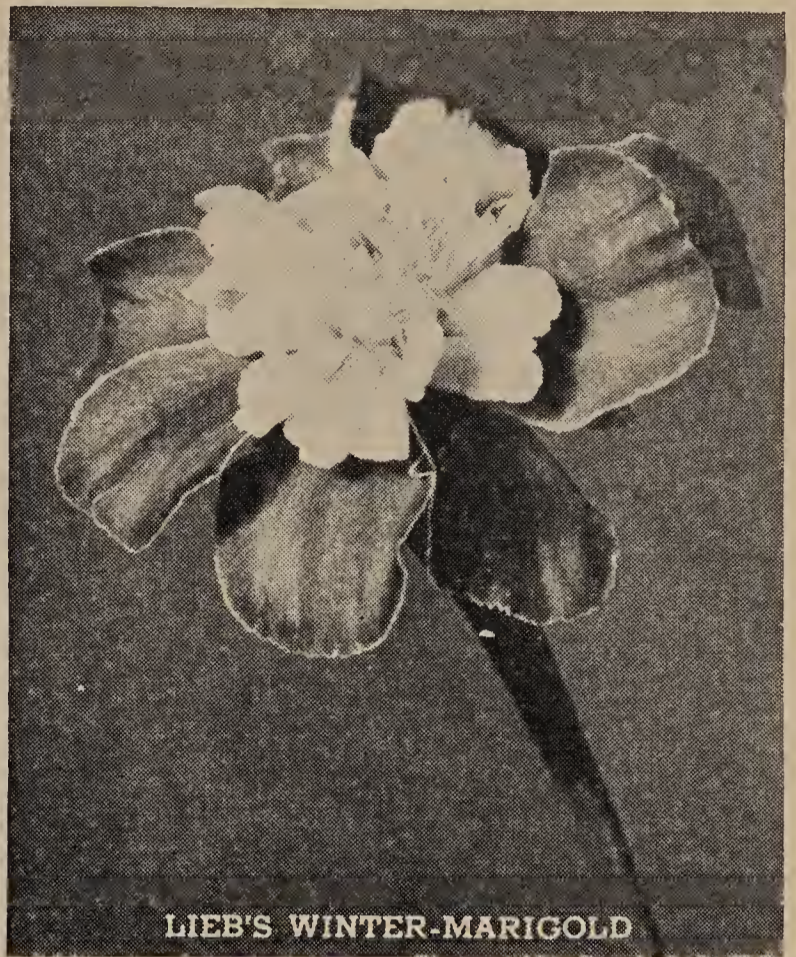

Rose colored perennial baby's breath, flowering after the paniculata varieties have passed. Flowers are produced the first season from seed and it is perfectly hardy. Height three and one-half to four feet. Per packet 35c.

NEW MARIGOLD, DIXIE SUNSHINE

This is an entirely new Chrysanthemum-flowered type of Marigold. It comes 100% fully double without the familiar Marigold odor in the flowers. The brilliant golden-yellow flower is actually a head of tiny five-petalled flowers, a lacinated effect. Tall bushy growth, rich green foliage, flowers on fine stems for cutting. Packet, 35c.

Marigold, Dixie Sunshine.

LIEB'S WINTER-MARIGOLD

LIEB'S WINTER-MARIGOLD

Mahogany-brown with golden yellow crested center. Blossoms 3 inches in diameter of wonderful keeping quality.

With 2¼" stock planted during September or October cut flowers can be had in December and continue well into May. The plants are at their best during January and February when cut flowers are not too plentiful.

Seed, \$1.00 packet. Plants, 2¼", \$12.00 per 100.

NASTURTIUM, DWARF DOUBLE GOLDEN GLOBE

The plants are truly dwarf and compact, totally without runners. They are very free-flowering and the well formed double flowers of deep golden yellow are delicately sweet scented. We feel sure that this compact variety will be even more popular than the Golden Gleam. Packet, 25c; 75c per oz.

Nasturtium, Dwarf Double Golden Globe.

FLOWER SEED SPECIALTIES—Continued.

MARSHALL'S NEW ORNAMENTAL PEPPER

An excellent plant for Fall and Christmas decoration. It has been pronounced by growers, who have tried this Pepper for us, as far superior and more ornamental than varieties previously grown. Plants are compact, about 6 to 9 inches high, with good, deep green, heavy foliage and are literally covered with small oval fruits in shades of purple, red and white, and brilliant scarlet. 50c per packet.

PETUNIA, DWARF ALL-DOUBLE VICTORIOUS MIXTURE

A new strain of All-Double Dwarf Giant Fringed Petunias. The plants grow twelve inches high and are profuse blooming, producing 100% double flowers in a wonderful range of brilliant colors.

The individual flowers are very large and fully double. 75c per packet.

PETUNIA, ROSE GEM

A real rose-pink Petunia in miniature form. This charming addition to the new miniature group of Petunias which was started with Pink Gem grows 5 to 6 inches high. The plant is neat and compact and is literally covered with rich rose-colored blooms about two inches in diameter. Packet, \$1.00.

RANUNCULUS

MARSHALL'S SUPER HYBRIDS

We have made arrangements with a prominent New Zealand grower who has been supplying this wonderful strain of Ranunculus that has been taking the first award at the International Flower Show in New York.

Fresh seeds will arrive here in March and may then be sown in greenhouse, these plants will bloom the following Spring, a selection can then be made for bulbs with the finest flowers to be used for exhibition purposes the following season.

This is the finest strain that has been placed on the market. \$1.00 per packet; 6 packets for \$5.00.

SCHIZANTHUS WISETONENSIS
MONARCH RE-SELECTED STRAIN

This is a superlative mixture and a great advance on anything hitherto available. The large pansy-like flowers in all shades of brightest rose, pink, violet, purple and many indescribable variations make a riot of color almost unbelievable. The flowers have immense petals and this strain is distinct from all other mixtures. Per packet 75c.

VIOLA, NORMANDIE

A remarkably handsome variety, bearing large, self-colored flowers of a rich burgundy red-purple. A really attractive new variety which will, we are sure, prove very popular. Packet 50c.

Zinnia, Scabious Flowered.

ZINNIA, SCABIOUS FLOWERED MIXTURE

Add variety to your Zinnia garden with this new type.

An odd and most attractive Zinnia which deserves to be more widely grown and better known. Flowers which are somewhat less than medium-sized resemble an annual Scabious. They are extremely free-flowering, growing 2 to 2½ feet high. Packet 25c; ¼ oz. \$1.00.

NOVELTY GARDEN ROSES

Better Times. H. T. Plant Patent No. 23. The brilliant cerise flowers are large, double and delicately fragrant. Being produced on long straight stems, they are excellent for cutting. Foliage is leathery dark green. Strong plants, \$1.50 each.

Carrie Jacobs Bond. The Most Outstanding Rose of the Decade. Howard & Smith, 1935. U. S. Plant Patent No. 158. A magnificent new Rose named in honor of the author of "The End of a Perfect Day." Of aristocratic growth with large, double blooms of ideal form carried singly on long, upright stems. The color is an enchanting rich deep rose enhanced by a luminous coral sheen. Moderately fragrant and good at all seasons. We feel confident that it will be the most popular Rose of the years to come. \$1.50 each.

Crimson Glory. Kordes, 1934. U. S. Plant Patent No. 105. A truly glorious Rose with large, urn-shaped buds opening into well-farmed flowers of an intense deep and vivid crimson with a beautiful soft velvety nap. Forms sturdy, symmetrical plants well covered with showy blooms. It is bound to become one of our most popular garden Roses. Awarded Silver Medal, International Flower Show, 1934. \$1.25 each.

Little Beauty. Howard & Smith, 1935. U. S. Plant Patent No. 149. The herald of an entirely new race of everblooming Roses. Splendid for garden display because it combines mass color effect with quantity of blooms borne throughout the season. The color of the formally arranged blooms is a brilliant cerise of wonderful purity. As the flowers pass their prime they assume a pleasing soft deep pink of a warmth that is distinctly attractive. An enchanting variety. \$1.25 each.

Nigrette. H. T. (The Black Rose of Sangerhausen). Plant Patent No. 87. The cup shaped flowers are intensely deep maroon with blackish velvet sheen and are deliciously fragrant. It is the darkest of roses, appearing almost black from a little distance. The petals do not burn in the sun. The plant is continuously in

bloom, spending most of its energy in forming blossoms. The sensation of the European rose world is now available for the first time in this country. Strong Plants \$2.00 each.

NEW EVERBLOOMING PILLAR OR SHRUB ROSE

Skyrocket (Kordes, 1934). A real everblooming Pillar or Shrub Rose producing enormous flower clusters throughout the entire season. Makes a magnificent display with its large clusters composed of medium-sized brilliant rich red blooms. Of straight, upright habit which makes it most desirable and valuable either as a Pillar Rose or planted in combination with various kinds of shrubs. A forerunner of a distinct new race. \$1.25 each.

NEW EXHIBITION ROSE

Symphony (Wiegand, 1934). U. S. Plant Patent No. 79. This is an everblooming Hybrid Perpetual Rose bearing handsome, massive blooms of perfect form often measuring 6 inches in diameter. They are carried on stout, straight stems. The buds are bluish-pink opening to pale rose with deep pink in the center and showing lighter at the edges. The open flowers are full and of symmetrical shape. A truly magnificent Rose. \$1.50 each.

OUTSTANDING NEW HARDY CLIMBING ROSES

Easlea's Golden Rambler. U. S. Plant Patent No. 114. Now that this new English Rose has flowered in this country there can be no doubt that it is the most outstanding hardy yellow climbing Rose we have—rich deep golden yellow with a sheen of light orange. The blooms are arranged in large clusters and they have a pleasing fragrance. \$1.50 each.

Golden Climber. (Mrs. Arthur Curtiss James). Plant Patent No. 28. A yellow climbing Rose for zero temperatures. Semi-double blooms of pure gold; fade very little. Delightfully fragrant. 15- to 18-inch stems to cut. Blooms over a long period in early summer; again in late summer and fall. Plants vigorous with handsome foliage. \$1.50 each.

For other Roses see pages 76-77.

NEW AND DISTINCTIVE PLANTS

ANGELONIA SALICARIAEFOLIA

A most fascinating tender perennial which may be used as a pot plant, but experience has proven it to be a most desirable bedding plant. It will bloom consistently throughout the season, will endure excessive drought and, on the other hand, has withstood heavy rain storms. The plant is well branched and festooned with Gloxinia-like blossoms of purplish blue with white throats. Will bloom its best when grown in poor soil. Plants from 2 1/2-inch pots, \$3.00 per doz.; \$25.00 per 100.

HARDY ASTERS

(Michaelmas Daisies)

Frikarti (Wonder of Staefa). Large flowers of a Wisteria-violet shade with large yellow centers. This Aster has a longer blooming period than any other variety, flowering from late August to frost. Height 2 to 2 1/2 feet. Pot plants only. Three for \$1.50; \$4.50 for ten.

New Dwarf Hardy Asters.

Red Rover. Deep rosy red flowers with golden center; buds bright red, giving us the first red fall Aster. Compact habit; very free blooming. Should be in every border. A real novelty for the fall garden. 3 to 4 ft. September to frost. 3 for \$1.80; 10 for \$5.00.

NEW DWARF HARDY ASTERS

A new race of dwarf, compact, free flowering Hybrid Asters, flowering in September and October when there is generally a scarcity of low growing flowering plants.

Constance. A pure shell-pink of very graceful habit. October. 9 inches.

Diana. Large delicate soft pink semi-double flowers with feathery foliage. September. 9 inches.

Hebe. A compact variety, with small deep pink flowers. An ideal rock plant. September. 10 inches.

Lavanda. Free flowering lavender-blue, commencing to bloom early September. 6 inches.

Lilac Time. Lovely soft lilac flowers, bushy, and free flowering. September-October. 12 inches.

Niobe. Pure white flowers, dwarf compact habit. September. 6 inches.

All above dwarf Asters: 3 for \$1.50; 10 for \$4.50.

Truehedge Columnberry. 2-yr.

NEW GREENHOUSE CARNATION

KING CARDINAL

We consider this new patented red Carnation one of the best yet introduced. It has large brilliant deep red flowers, on long stems, which measure up to 4 inches in diameter.

Plants are strong and it is a continuous bloomer. Rooted cuttings. \$4.00 per doz.; \$24.00 per 100.

CARNATIONS—NEW ENGLISH VARIETIES

Originators' Descriptions

Robert Allwood. A grand scarlet of large size and form which experts describe as the finest Carnation ever raised. A very strong and quick habit of growth with erect stems and calyx that never bursts. Will outproduce Spectrum Supreme in the number of high-class flowers cut per plant. Vivid scarlet during the 4 seasons of the year and a good keeper.

Dimity. White, variegated deep claret, more heavily towards the edge of petal. This is a seedling from Eldoro having the strength of constitution and ease of cultivation of this variety. A very popular color in the New York market and a heavy producer of high-class flowers. Good keeper.

Wivelsfield Claret Improved. A seedling from Wivelsfield Claret, preserving all the excellent qualities of its parent, with a deeper toned color. The habit of growth is stronger, making a plant double the size of its parent, with large even flowers and rigid stems. This is undoubtedly the best variety in the claret and purple shades. The best keeping Carnation we know of and popular in the market.

Rooted cuttings: Three above varieties, per 100, \$40.00; per doz., \$6.00.

CHRYSANTHEMUM, New Early Korean Hybrids

A selection of varieties which flower from 10 days to 2 weeks earlier than the Korean crosses heretofore offered. See page 75.

GYPSOPHILA REPENS BODGERI

A new dwarf white tinted pink Gypsophila reaching a height of about 2 feet. It blooms at least 2 weeks earlier than any other double flowering form. 75c each; \$6.00 for 10.

NEW CLARET-COLORED VINCA

Vinca Alpina. How very welcome is this newcomer to the short list of good ground covers that can be planted in either shade or sun. It is more than that, since it lends a distinctive note to the color scheme with its abundant large velvet flowers of deep claret.

The plants continue to bloom from earliest spring throughout the growing season until late fall, covering the ground amply with rich green foliage, though never "over-running" the garden. Its hardiness can be depended upon. Since it is one of those unusual characters which can adapt itself to any situation, it can be planted in mass either under trees, or again, hold its own for loveliness in the open garden. 3 for \$1.20; \$3.50 for 10; \$30.00 for 100.

TRUEHEDGE COLUMNBERRY

(Berberis Thunbergi Pluriflora Erecta)

U. S. Plant Patent No. 110.

An exceptionally hardy, sensational new form of Barberry. Growth is dense, upright and pyramidal. The heavy foliage is evenly distributed from the ground up; berries very similar in size and color to Berberis Thunbergi. Ready made, compact hedges are obtained almost from the day Columnberry is planted, and a 9-inch plant is just as perfect a spire as the larger sizes. Can also be grown like boxwood into symmetrical specimens.

Marshall's Matchless Flower Seeds

ALL FLOWER SEEDS ARE MAILED FREE

The following list contains a most complete assortment of the choicest and most popular flowers for either conservatory, greenhouse or garden culture.

Annuals grow from seed, flower, mature their seed, and die in one year, or, in other words, the same season.

Hardy Annuals are those which can be sown in the open ground.

Half-Hardy Annuals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Biennials grow from seed, sown from June to August, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Half-Hardy Biennials require the protection of a cold frame or cool house during Winter.

Perennials grow from seed, and continue flowering annually for many years after the first season. Some varieties flower the first season if planted early in gentle heat.

Hardy Perennials can remain in the open ground during Winter without protection.

Half-Hardy Perennials require the protection of a cold frame or cool house during the Winter.

Tender or Greenhouse Perennials require window or greenhouse culture, free from frost during Winter and thrive in the garden during the warm months.

WILD GARDEN FLOWER SEEDS

This mixture contains over 100 varieties of the oddest and choicest annuals imaginable. For naturalizing purposes or sowing broadcast, nothing approaches wild garden flower seeds for effect and cheapness. No care is necessary, and a never-ending succession of bloom and fragrance can be obtained throughout the entire summer and fall. Pkt. 10c, oz. 25c, 1/4 lb. 75c.

Marshall's Spencer Sweet Peas

Sow as soon as the ground can be worked in the Spring in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial.

Keep well watered during dry periods and spray periodically to prevent injury from green fly or aphid.

In view of the numerous Sweet Pea introductions this list has been again revised and includes those varieties which trials have proved to be the best in the various colors.

"STIMUGERM" FOR SWEET PEAS
 Sweet Peas flower earlier, longer and better treated with **Stimugerm.** Small size, 25c.; large size, 35c.

Marshall's Early Flowering Spencer Sweet Peas

The Early Flowering Spencers bloom about two weeks earlier than the late flowering varieties when grown under congenial conditions. The flowers are beautifully waved and produced on long stems, four flowers predominating on each stem. For winter flowering under glass or in the southern states they far surpass the Late Spencers. When grown in the open ground they will usually bloom in about 100 days after planting.

Marshall's Vegetable Seeds

With General Directions for Cultivation

"The W. E. Marshall & Co., Inc., give no warranty, express or implied, as to the description, quality, productiveness or any other matter of any seeds or bulbs it sells and will not be responsible for the crop."

ARTICHOKE

One ounce will sow 100 feet of row, and produce about 500 plants.

A rich, sandy loam is best adapted for this plant. The seed should be sown in drills 1½ inches deep and 1 foot apart. Transplant to rows 3 feet apart. They reach maturity the second year. Protect in Winter by a covering of leaves or coarse manure.

Large French Globe. Heads large, fleshy and of rich flavor. Pkt. 25c, ½ oz. 60c, oz. \$1.00.

ARTICHOKE PLANTS

Large French Globe. Plants ready for shipment after April 1st. Doz. \$2.50, 100 \$20.00.

Jerusalem. Grown for the tubers, which resemble Potatoes, and are cultivated in a similar manner, but the rows should be at least 4 feet apart. Qt. 40c, peck \$2.50.

ASPARAGUS

One ounce will produce about 200 plants.

Sow in Autumn or in Spring as soon as the soil is in good working condition. At one or two years transplant to permanent beds.

	Pkt.	Oz.	¼ lb.
Polmetto. A fine variety, producing large, green Asparagus	\$0.10	\$0.20	\$0.45
Giant Washington. A rust resistant variety, with long, dark green stalks	.10	.50	1.50

ASPARAGUS ROOTS

It requires 100 plants for a single row of 150 feet.

Culture.—The permanent bed should be trenched or ploughed very deeply, and well manured with rich, thoroughly decayed manure. Set the plants 18 inches apart in rows, carefully spreading out and separating the roots and deep enough to admit of the top of the plants being covered 6 inches. In November the plants should have their annual top-dressing of manure after the stalks have been cleared away.

BEANS

Beans like a well drained, rich and light loam. Plant about the middle of April when warm and favorable, and at intervals throughout the season for a succession, until the latter part of August. Bush varieties should be planted in drills 2 feet apart, and from two to six plants to the foot in a row. Keep them well cultivated and draw the earth up to the stem. For String Beans gather the pods as soon as fit for use.

DWARF SHELL BEANS

Sow in drills 2 feet apart as soon as warm weather has set in; soil should be light and rich; covering beans with about 2 inches of soil.

CHICORY ROOTS. Strong for forcing. Doz., \$1.00; 100, \$7.00.

COLLARDS

Sow seeds, as for Cabbage, in June, July and August, for succession. Transplant when a month old in rows a foot apart each way and hoe often.

Georgia. Cabbage greens used as a substitute for Cabbage. Pkt., 10c; oz., 20c; ¼ lb., 50c.

CORN SALAD, OR FETTICUS

One ounce will sow 150 feet of drill.

Sow in September in drills 8 inches apart, covering the seeds lightly, and protect from frost by light covering of hay and litter. The seed may be sown in spring.

Large-Seeded. The most popular variety grown. Pkt., 10c; oz., 20c; ¼ lb., 60c; lb., \$2.00.

CRESS, OR PEPPERGRASS

One ounce will sow 150 feet of drill.

A popular salad which should be sown early in the Spring very thickly in shallow drills and at short intervals for succession, as it soon runs to seed.

	Pkt.	Oz.	¼ lb.	Lb.
Extro Curled. The best variety grown; leaves are beautifully cut and curled; highly prized for garnishing.	\$.10	\$0.20	\$0.50	\$1.50
Upland, or Broad-leaved Winter. A garden substitute for Water Cress; crisp, tender and perfectly hardy.	.10	.20	.50	1.50
True Water Cress. Water Cress requires a stream of running water, ditch or pond, in which it will grow without care, except at first keeping weeds from interfering with it.	.25	.75	2.50	

Marshall's Golden Plume Celery.

Italian Chicory.

True Water Cress.

Corn, Sweet

Plant in hills 3 feet apart each way, dropping five or six kernels in each hill, or in rows 3 feet apart, and the plants thinned out 8 to 9 inches in the row. From May until the middle of July a succession planting can be made every two or three weeks, and a continued supply can be had until frost kills the plants.

CUCUMBERS

One ounce to 60 hills, 2 to 3 pounds to one acre.

For very early use seed may be started in heat and the plants set out in May. Pieces of inverted sod are an excellent medium for starting and growing early Cucumber plants as they can readily be lifted from the hotbed to the garden without disturbing the young plants growing upon them. For main crop plant in hills 4 feet apart at the end of May. Keep the young plants safe from the striped bug dusting with dry plaster or powdered Hellebore. Leave four strong plants to each hill.

DANDELION

The Dandelion affords one of the earliest and most healthful spring greens or salads.

Improved French. Large thick leaves. Pkt. 10c, oz. \$1.25, 1/4 lb. \$4.50.

Italian, Cichoria Catalogna. The leaves are more upright than the Dandelion. Pkt. 15c, oz. 60c.

EGGPLANT

One ounce will produce about 2000 plants.

The Eggplant will thrive well in good garden soil. The seed should be sown in hotbed or warm greenhouse in March or April, and when about an inch high put in 2-inch pots. Plant about June 1st, 2 1/2 feet apart. If no hotbed is at hand they can be grown in any light room where the temperature will average 75 degrees.

	Pkt.	1/2 oz.	Oz.

Curled Siberian Improved. Uniformly dwarf; green curled; hardy10	.30	1.00

KOHL-RABI

One ounce will sow 300 feet of row.

This delicious vegetable should be in every vegetable garden. It forms a bulb at the base of the stem above the ground. Successive sowings should be made throughout the season and good cultivation is necessary. Use the bulbs of Kohl-rabi when they are about the size of an apple as they become hard and stringy if grown too long.

	Pkt.	1/2 oz.	Oz.	1/4 lb.
Early White Vienna. Very early and should be used before being fully grown. Flesh white with greenish white skin	\$0.10	\$0.25	\$0.50	\$1.50
Early Purple Vienna. Similar to the preceding, except in color10	.25	.40	1.25

LEEK

One ounce will sow 200 feet of drill.

The Leek is very hardy and easily cultivated; it succeeds best in light but well enriched soil. Sow as early in the spring as practicable, in drills 1 inch deep and 1 foot apart. When 6 to 8 inches high transplant in rows 10 inches apart each way, as deep as possible, that the neck, being covered, may be blanched.

Mushrooms

MUSHROOM SPAWN

Ten pounds will spawn about 10 feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate and in the open air during the summer and fall months. Having procured the spawn, the next thing to be attended to is to make preparation for the beds. About two or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up lay out your bed, according to your requirements, say 3 feet wide, 10 feet long and from 2 to 3 feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces 2 inches square, and put them 6 inches apart, all over the bed; then cover the bed with 2 inches of rich soil. If everything goes well, you may expect Mushrooms in about five or six weeks. When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in spring.

Pure Culture Prolific Direct Bricks. An American-made spawn which produces large crops of large size, deep cream and excellent quality Mushrooms. Per brick 45c, 10 bricks for \$3.50, 50 bricks \$15.00.

Bottle Spawn. This spawn is very perishable and can only be kept in cold storage. Orders filled from the factory. Per quart bottle \$1.25, 12 quarts for \$12.00.

PARSNIP

One ounce will sow 200 feet of drill

Sow Parsnip seed as early in the spring as the weather will permit, in drills from 15 to 18 inches apart, covering with fine soil to the depth of half an inch. The soil should be rich and deep; manured if possible, the previous autumn. Thin out the young plants to about 6 inches apart and keep the surface of the ground open and free from weeds. It is perfectly hardy and may remain in the ground through the winter. Indeed, the fine sugary flavor is only perfected by a severe frost.

Dibble's Russet Potato

Winter Luxury Pumpkin

POTATOES

GROWN EXPRESSLY FOR SEED IN MAINE OR PRINCE EDWARD ISLAND

Peck will plant 100 feet row. Ten bushels cut tubers will plant 1 acre.

The Potato can be grown with varying success on soils of all kinds and in all conditions of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills or broadcast over the hills and ploughed in. In highly enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in spring as the ground can be had in fair working order, in hills or ridges, about 3 feet apart, cover lightly with soil about 4 inches deep.

Beauty of Hebron. Slightly flesh colored skin with pure white flesh; very productive and of the finest quality.

Bavee. Extra early; fine quality; flesh white.

Dibble's Russet. This is the best main crop Potato in cultivation. The tubers are round to oblong in shape, of good size, with white flesh and covered with russet skin. The quality when cooked cannot be excelled. It also has great disease-resistant and blight-proof properties.

Early Rose or Spaulding Rose. Very early; fine quality; very productive, skin shaded rose color.

Green Mountain. Oval shape; white skin and flesh; heavy yielder and good for winter use.

Irish Cobbler. One of the best extra early varieties.

At the time of going to press with this catalogue the Potato market is so unsettled that prices are subject to change.

Any of the above varieties. Bu. \$3.00, bag of 150 lbs. \$6.50.

Certified Stock of Green Mountain and Irish Cobbler. Bu. \$3.25, bag of 150 lbs. \$7.00.

Potatoes are forwarded by express or freight as directed, purchaser paying charges.

Weights—Bushel, 60 lbs.; Bog, 2 1/2 bushels, 150 lbs.

SWEET POTATO PLANTS

Red or Yellow Variety. Plants ready end of May. Per 100 \$1.00, 1,000 \$7.00.

PUMPKIN

One ounce will plant 50 hills

The common practice is to drop two or three seeds in every second or third hill in the Cornfield, but if cultivated on a large scale the seed may be sown in hills 8 feet apart each way, four plants to each hill, and otherwise treated in the same manner as Melons or Cucumbers.

Marshall's Gladiolus

There are no other summer-flowering bulbs so satisfactory, needing so little attention and thriving so well in almost any ordinary soil as the Gladiolus. Set the bulbs from 3 to 6 inches apart in rows, or for mossing 6 inches apart, and about 4 inches deep.

Our selection has been made from many varieties and includes all those of exceptional merit and a wide range of colors.

GLADIOLUS FOR LATE PLANTING

Gladiolus can be had in flower in late September and October if the bulbs are retarded in cold storage.

We are prepared to place in cold storage any varieties if ordered before the middle of April and ship at any date required for later planting.

Gladiolus Thrips. All bulbs we send out have been fumigated to kill this pest before shipping. For further treatment we recommend spraying with **Rotecide** or **Red Arrow Insecticide** and soil treatment with **To-nacide**.

All Gladiolus we offer are **First Size Bulbs**
6 bulbs sold at the dozen rate. 25 at the 100 rate.

TO-NA-CIDE. A new insecticide for controlling thrips on Gladiolus when growing. 5 lbs. \$1.75, 25 lbs. \$7.00.

Primulinus Type Gladiolus.

SPECIAL NOTICE

All our Gladiolus bulbs are strictly first class and range in size from 1 1/2 to 2 1/2 inches in diameter. Some varieties do not make large bulbs, but we guarantee all we send out to produce first-class flowers.

HOLE-IN-ONE BULB PLANTER

A handy tool for planting Gladiolus and other bulbs. Makes a clean round hole any depth. A real time saver. Small size, each 50c. Large size with 30-in. handle, \$4.00.

HARDY GARDEN LILIES

Among the stateliest of all hardy plants, Lilies during their respective flowering seasons, constitute the chief attraction in the hardy border. They prefer a well-drained soil, and should remain undisturbed for years. In the Autumn give the bulbs a heavy mulching of leaves; coarse manure or straw will prove highly beneficial.

Lilium Longiflorum Praecox

GRIFFITH'S HYBRID

SHUKSAN: Cadmium with a faint flush of red, with sparse dottings of black. Green at base of throat with buds of reddish hue. Anthers purplish black.

Prices of above, bulbs measuring 6 to 8 ins. in diameter, \$1.00 each; 3 for \$2.75; \$10.00 per doz., postpaid.

LILIUM MAXWILL

This was one of the finest hybrids shown at the Lily conference in London, 1933. It is a cross between *L. Maximawiczii* and *L. Wil-mottiae* and combines the free flowering qualities of the latter with the sturdiness of the former. Color cinnabar-red. Flowering bulbs, \$1.25 each; 3 for \$3.50; \$12.00 per dozen.

THE CREELMAN LILY (Princeps Hybrid)

The well-known Creelman Lily originated a few years ago, the result of a cross between *L. Regale* and *L. Sargentiae*. Previous to this event several crosses had been made using the same parentage and were classified as *L. Princeps*. The Creelman Lily is undoubtedly superior to the others in stamina and size of flowers. It may be called a glorified *L. Regale* coming into bloom about two weeks later.

We do not claim that the bulbs we offer are the true Creelman Lily, but they are seedlings of the true parent and their blooms have shown remarkable form. Bulbs measuring 4 to 6 inches in diameter \$1.50 each; \$15.00 per dozen.

The Creelman Lily

"Consider the Lilies"

No book ever published on Lilies has been so enthusiastically received by flower lovers and this acclaim has not been confined to America alone but throughout the entire world, eleven hundred copies having been purchased alone by the British public who hold the beautiful Lily in high esteem.

In presenting this treatise, Mr. W. E. Marshall, the author, was prompted by a desire to assist the amateur but his wishes have gone beyond his expectations as his brochure is now recognized by experts as a text book on this interesting genus.

Over one hundred varieties are described with complete history and cultural directions. A most interesting book to read, illuminated with 67 magnificent colored plates.

There is only a limited supply of this book which will be sent postpaid for \$2.00. It also may be procured free with a cash purchase of Lily bulbs amounting to ten dollars.

LILIES FROM SEED

Hardy Lilies may be grown from seed and brought into bloom in two years, while other species require a longer period. We have prepared a leaflet giving the varieties we offer in seeds and with cultural directions on same. Sent free on application.

MARSHALL'S COPPER LIME DUST

For Checking Botrytis Blight on Lilies

Botrytis Blight is a fungous disease that makes its appearance on the lower leaves and sometimes on the stems, buds and flowers in the form of oval shaped light brown spots. It is most troublesome during wet weather. Easy to apply. Full directions for use printed on containers. Per lb. 50c, 5 lbs. \$2.25. Postage extra at zone rates.

HARDY GARDEN LILIES

The herbaceous border is the ideal place in your garden for hardy Lilies. A few bulbs dotted here and there, where the close companionship and friendly shade of neighboring plants help their growth, they eventually become great colorful colonies, enhancing the entire beauty of the border with their graceful, dignified, and majestic heads.

If bulbs are planted just as soon as the ground is in condition in spring, one may expect excellent results the first season. We are in position to supply dormant bulbs as early as required. Order early and look for good results.

WATER LILIES

We are pleased to announce that we are again in a position to offer large plants of water lilies. These large plants insure a longer blooming period, many of them bearing developed flower buds when shipped. We stress the fact that these are large roots and are packed and shipped in sphagnum moss.

TROPICAL DAY BLOOMING WATER LILIES

Garden lovers are fast becoming acquainted with the superiority of the Tropical Water Lily over the old time Hardy Water Lily. The fragrant tropical blooms, with their great variety in color and shade, are larger and much more numerous than any of the Hardy varieties. Their long stiff stems not only add to their beauty in the pool, but make excellent cut flowers.

- Amethyst.** Lovely amethyst blue, for tub or large pools, new. Each \$3.50

Herbaceous Perennials and Rock Garden Plants

Perennials, never more popular than today, comprise most of the best flowers and make a foundation for any garden. They exist in infinite variety and provide a succession of flowers in every conceivable hue from early Spring to late Fall and range in size from the tiniest edging material to the tall plants suitable for a background.

For the best effect it is essential to plant in groups. We are therefore continuing to offer perennials in quantities of not less than three of one variety as satisfactory results cannot be obtained by using one of a kind.

SEEDS OF PLANTS FOR ROCK GARDENS

Being frequently asked to recommend seeds of plants not necessarily alpines—suitable for use in American rock gardens, we have compiled the following lists for ready reference. All those offered are of easy culture and can be relied upon to give greater general satisfaction than is usually obtained with the rarer and more difficult alpines.

While the veteran rock gardener may decry the use of annuals in the rock garden, we stress their utility for making a quick showing either in temporarily replacing losses or for immediate effect in newly constructed rock gardens.

Garden Chrysanthemums

NEW EARLY KOREAN HYBRID CHRYSANTHEMUMS

The following Korean Hybrids were selected from thousands of seedlings, not alone for the novel color tones in many of them and their variations in form, but most particularly because of their flowering ten days to two weeks earlier than the Korean crosses heretofore offered.

The varieties here offered will begin flowering in early September and continue well through October.

NIOBE. A vigorous healthy plant of dwarf compact habit. Flowers over 2½ in. in diameter, of a clear glistening white with yellow disc, are freely produced, fully covering the plant.

SAPPHO. Compact dwarf plant covered with good-sized pure yellow single flowers.

JUNO. Very dwarf compact plant, producing an abundance of single flowers opening a coppery-red, and fading with age to a salmon-flesh.

VESTA. A plant of medium height and great vigor literally covered with flowers over 2½ in. in diameter, of a deep golden orange shade, almost a duplex.

NYSA. A large rather tall upright plant growing 2½ to 3 ft. in height and producing a great abundance of single flowers 3 in. in diameter. The color is very clear rosy-lilac.

FORTUNA. Very vigorous plant of medium height and covered with unique curly petaled oxblood-red flowers 3 to 4 in. in diameter. Very striking.

THALIA. A compact bushy plant growing 18 to 24 in. in height. The duplex flowers are of a lively orange shade and excellent form.

PSYCHE. Wonderfully dainty 4 to 5-in. single blooms are produced, with wiry stems, on strong healthy plants of medium height. Color, a clean lively shell-pink.

CLIO. Dwarf compact plant of pleasing habit producing masses of deep carmine-rose duplex flowers.

HESTIA. The nicely-formed semi-double flowers are very freely produced on compact bushy plants of medium height. The color is a very delicate rose-pink with a white halo around the small yellow disc.

Any of above—3-in. pot plants—ready April 1—3 for \$1.50, doz. \$5.00.

CHRYSANTHEMUM MORIFOLIUM

A very congenial companion to the early flowering Korean Hybrids is this beautiful species from the Orient.

A vigorous free-branching plant of very symmetrical habit producing hundreds of one- to one-and-a-half-inch single pink flowers beginning about the middle of September.

Wonderfully useful either in the border or rockery.

3 for \$1.20, doz. \$3.50.

Set of one each of the above 11 varieties—\$5.00.

Korean Hybrid Chrysanthemums.

KOREAN HYBRID VARIETIES

These varieties have created quite a lot of interest because of their freedom of bloom, vigorous habit, and beautiful pastel shades.

APOLLO. The most profuse bloomer of them all. A sparkling combination of bronze, red and gold, suffused with glowing salmon. Blooms about October 12, and grows 2½ feet high. Flowers 2 inches across.

CERES. Old gold blended with chamois-yellow and dusted with coppery bronze. A handsome plant which blooms about October 10. Height 2 to 2½ feet.

DAPHNE. A lovely large flower almost matching the color of Daphne cneorum—a splendid pink with a sheen of lilac-rose. Flowers 3½ inches across. Blooms about October 12. Height, 2 to 2½ feet.

DIANA. A charming color blend of Chatenay rose-pink mingled with lilac-rose and soft salmon. Has triple rays of petals. Blooms about October 12. Height, 2 feet.

MARS. Deep amaranth-red changing to wine-red overlaid with a velvety sheen. The latest to flower, about October 15. Height, 2 to 2½ feet.

MERCURY. (Plant Patent No. 58). Bronze-red on opening, changing to coppery bronze when maturing. Nicely formed, showy blooms about 3 inches across. Begins blooming about October 5. A splendid well-lasting cut flower. 2 feet.

Pot plants of above—3 for \$1.50, doz. \$5.00.

RECENT INTRODUCTIONS OF HARDY CHRYSANTHEMUMS

AMELIA. (Pink Cushion). A very compact, free-flowering and very early soft rose small Aster.

CAVALIER. Very graceful single with small flowers of a deep wine color, very freely produced.

DISTINCTION. A small, perfectly double, yellow flower with red tips. Blooms freely and is surely most distinct.

ENCHANTRESS. Splendid, large, semi-double blooms of a clear soft rose which is always greatly admired.

GRANNY SCOVILLE. A very large decorative or Aster-flowered sort. Perfectly double blooms of a warm coral-bronze.

JEAN TREADWAY. Unusually popular pink Aster.

OPAL. Splendid medium-sized double flowers of a coppery-rose changing to salmon-flesh.

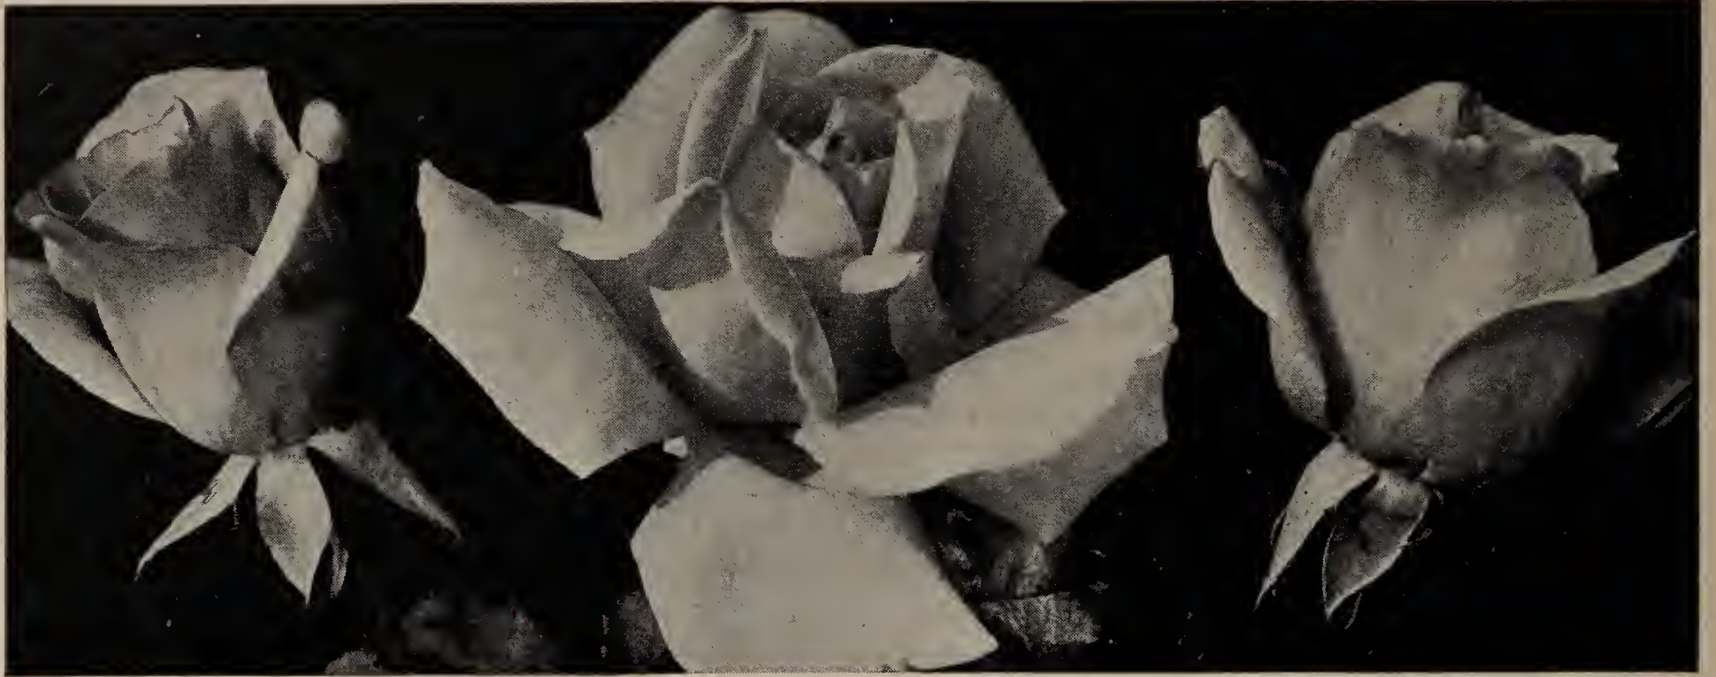

SENSATION. A sensational and strikingly attractive single yellow in which every petal is tipped with scarlet.

THE CHIEF. The deep double blooms are bright rich scarlet with a golden reverse giving the flower an artistic appeal with their unusual showy color combination. A beautiful large flower.

SUNBRIGHT. A pure yellow single that glitters and scintillates in the sun and under artificial light.

Pot plants of above—doz. \$4.00, 100 for \$25.00.

Hybrid Tea or Everblooming Roses

Suggestions for Spring Planting of Roses

The soil should be thoroughly cultivated and a liberal supply of rotted manure added. In planting, dig a hole sufficiently large to accommodate the roots when spread out on the bottom of the hole. In filling in the soil, shake the plant lightly in order that the soil may mix between the roots. Fill in the soil and firm it in order that the plant may be solid. Be sure to see that the lower parts of the lower branches are below the surface of the soil. Do not plant in a mound, the surface should be level. Cut back the branches to within 4 to 6 inches of the surface of the ground. With this treatment the best results may be obtained.

INSECT-O-GUN

Attached to your garden hose, the Insect-O-Gun ejects a penetrating wide-angle spray with tremendous velocity, reaching every insect in its path with telling results.

The Insect-O-Gun is equipped with a standard pint mason jar and can be used with any insecticide requiring water solution. No adjustments are necessary to secure the correct spraying proportion, and there are no moving parts except the handy trigger for operating the gun. When full, the gun holds sufficient insecticide to completely treat the average garden.

The Insect-O-Gun is strongly built of heavy, non-rusting die metal and with reasonable care will last a lifetime. Any standard pint mason jar can be used with the unit. It is boxed complete with full instructions, ready to attach to your garden hose for instant use. Each \$3.75.

GARDEN HOSE SPRAYER

Can be used with any garden hose for spraying or fertilizing, by placing the cartridges in the nozzle and using the water. Each \$1.00 Cartridge for insecticide 35c, for fungicide 25c. Fertilizer 25 for \$1.00.

AUTOMATIC LAWN-VEX

This simple device makes it possible for you to fertilize your lawn as you sprinkle. The Vex is an enameled brass cylinder 12 in. long and 3 in. diameter. It has two hose connections. One for the faucet, the other for the water to pass out through the hose charged with the lawn fertilizer. The cylinder contains a cartridge of Lawn Vex sufficient for a plot 40 x 60 ft. Vex Container and Cartridge, \$4.85. Extra Cartridges \$1.45 each.

SPRAYIT PLANTILIZER

The new and easy way to fertilize your lawn or garden as you sprinkle with the Sprayit Plantilizer. Just remove the nozzle from the hose and attach the Plantilizer and turn on the water.

Complete with 5 Cartridges, \$1.00. Refill Cartridges, set of 5 for 25c.

"ADCO" ARTIFICIAL MANURE

A simple preparation for making stable manure from garden refuse, grass clippings, weeds, leaves, vegetable tops, etc. It contains nothing injurious to health or animal life is odorless and weed free.

Refuse can be piled in a heap or pit and with "Adco" added to the refuse, causing the bacteria to rot and make manure. Fifty pounds of Adco makes a ton of well rotted manure.

Adco, in 25 lb. bags, enough for 12 wheelbarrows of waste or 1/2 ton of manure. Each \$2.00.

Adco, in 150 lb. bags, enough to make 3 tons manure. Each \$10.50, f.o.b. Carlisle, Pa.
